:: elwynor technologies ::

Welcome to Elwynor Technologies LLC! We are a small, experienced, customer-focused technology services company. We provide fractional CIO/CTO services, startup advisory services, staffing planning and hiring consulting, and technology architecture consulting.

We are also the largest and the most active ISV (Independent Software Vendor) for the Galacticom Major BBS/Worldgroup platform. Our products include MUD games, text games, ANSI games, utilities, and some client/server games and utilities. We also do custom work for the Galacticom platform.

Please have a look around, as this quick introduction can't do our services justice. If you have any questions about our products or services, or would like to discuss something not mentioned, please drop us a line at [info\(at\)elwynor.com](mailto:info@elwynor.com).
